***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, 11 and 12, drawn to a reverse circulation down-the-hole hammer assembly.

Group II, claim(s) 5, drawn to a down-the-hole hammer assembly.

Group III, claim(s) 6, drawn to a reverse circulation down-the-hole hammer assembly.

Group IV, claim(s) 7-10, drawn to a drill bit.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature of the claims of Group I is the longitudinally displaceable member that is resiliently biased toward the chuck end of the hammer assembly to clamp the upper end of the central tube.

The technical feature of the claims of Group II is the use of a split ring, guide bush and O-ring to connect the drill shank to the drill chuck.

The technical feature of the claims of Group III are the externally cylindrical regions along the central tube that are progressively increasing external diameter with distance from the drill bit end of the hammer.

The technical feature of the claims of Group IV is the circumferential band or collar and circumferential groove on the drill bit body to enhance the flow of air.

Since the inventions of Groups I-IV rely on different special technical features as pointed out above, the claims of Groups I-IV lack unity.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
